Event: Cleanliness Awareness Cum Drive at adopted water body Dilnag, an Important Spring in the Heart of Tral Town.

Date: 02-12-2022.

Organizers: NSS Units I and II & Eco-Club of College

Venue: Dilnag, Tral.

Detailed Report:

NSS Units I and II of GDC Tral led by programme officers and members of Eco-Club conducted an awareness cum cleanliness drive at an adopted waterbody Dilnag, Tral on 2nd December, 2022. Dilnag is a beautiful spring located in the heart of Tral town and is a main seat of recreation for the locals of the area. The inspiration for the drive was provided by the worthy principal of the college, Prof. Mushtaq Ahmad Lone who always talks about the need of cleanliness awareness and drives in educational institutions and other places of relevance. Volunteers from both the Boys and Girls wing participated in the drive. Programme officers interacted with the volunteers on the issues of pollution in water bodies. The volunteers responded actively and collected the waste (polythene pieces, plastic bottles and other waste stuff) from the water body. The waste was collected within the trash bins maintained by Floriculture Department of Tral. At the end of the drive, the programme officers advised volunteers to spread awareness about plastic pollution in water bodies within the students of the college and the people in their respective villages. Overall, the programme was a success as the outlets from the spring were fully cleaned in addition to the cleaning of the paths and the lawns of Dilnag.
